

SWIFT Rig Vacuum Systems

**Designed for Industrial use wherever
clean up is required.**

- Drilling Rigs
- Oil spills
- Onshore-Offshore spills
- Fluid recovery and containment
- Pipeline Spills
- Plants
- Industrial Maintenance

FLEXIBLE INSTALLATION – The compact skid design allows the Swift Vac to be installed almost anywhere on-board the rig.

APPLICATION – The Swift Vac is designed to reclaim drilling fluid spillages caused by tripping, pulling wet strings or any accidental spillage.

VERSATILE – It can also be used for various waste stream spillages such as wastewater or slurries. The cleaning of ditches, cellars and sumps plus the skimming of pits and cuttings boxes is also possible.

SAFETY – Improves workplace environment by allowing quick and easy removal of spillages especially in high traffic areas where slipping and falls are a hazard to personnel safety.
